

Dynamic Measurements Buyer's Guide

This Buyer's Guide lists manufacturers and suppliers of instrumentation for dynamic measurements grouped into the following eight categories:

- Calibrators
- Data Acquisition
- Electroacoustics
- Environment, Acoustics
- Environment, Vibration
- Machinery Diagnostics
- Structural Dynamics
- Transducers

Each category contains a series of numbered classifications for specific product identification. Company identifications are listed in order of: name, mailing address, telephone, FAX, e-mail address and website URL. These listings are updated on an annual basis from questionnaires sent to known companies.

All of the instrumentation systems and components listed are for the measurement of dynamic phenomena or the control of dynamic parameters. These phenomena include vibration, noise, shock, strain, force and pressure. The frequency range of the instrumentation is generally within the limits of DC to 100 kHz. Note that the listings cover both hardware and applications.

To locate the product or application of interest, refer to the main categories listed above then go to the detailed listings to locate the companies who offer that particular product or provide solutions for a particular application. Boldface company listings are advertisers in this issue.

Calibrators

1. Accelerometer
2. Audiometer
3. Hydrophone
4. Microphone
5. Proximity Probe
6. Sound Intensity
7. Sound Power

ACO Pacific, Inc., 2604 Read Ave., Belmont, CA 94002; 650.595.8588; 650.591.2891; acopac@acopacific.com; www.acopacific.com - (4)
