

Dynamic Test/Analysis Products Buyer's Guide

This Buyer's Guide lists manufacturers and suppliers of products for dynamic testing, structural analysis and finite element analysis grouped into the following seven categories:

- Analyzers and Controllers
- Physical Testing Machines
- Simulators
- Software
- Structural Exciters and Accessories
- Test Fixtures and Accessories
- Transducers and Signal Conditioners

Each category contains a series of numbered classifications for specific product identification. Company identifications are listed in order of: name, address, telephone, FAX, e-mail address and web site address. This information is updated annually from questionnaires sent to known companies. To locate the dynamic testing product of interest, first refer to the main categories listed above then go to the detailed listings to locate manufacturers who offer that particular product. The numbers after each company listing indicate the products that they offer. Boldface listings are advertisers in this issue.

Analyzers and Controllers

1. Laser Vibrometers
2. Multi-Shaker Controllers
3. Noise Generator Control Systems
4. Single-Shaker Controllers
5. Shock Analysis Systems
6. Structural Analyzers
